kronostecnica.

New practical elegant
and versatile,
modular paving concepts.

Perfect for outdoor and indoor areas, KronosTecnica is a system based on three colors wood finished porcelain tiles: Ebano, Rovere and Faggio; easy to collocate thanks to two simple methods of assembly, able to fit on every kind of soil.

The ceramic tile technology meets the elegance of the wood, it is the birth of a new product with a discreet charm, shifting on three delicate shades. Available in two different surfaces, the first more traditional proper for the indoor, and a second one presenting grooves on the surface, particularly adapt for the outdoor, thanks to its anti slip property. KronosTecnica is a complete solution of **outdoor floors**, with its accessories and variants like the Modulo LED. Two different patented methods of collocation contribute to make unique the Modulo Exter and the Sopraelevato.

**The two systems of
collocation of
KronosTecnica:
Modulo Exter and
Sopraelevato**

KronosTecnica is a versatile and unique floor thanks to its two original, patented and sole systems of collocation made in Kronos.

Modulo Exter is a very attractive, easily installed, environment friendly paving system. This innovative system consists of Plastic support combined with a rectified ceramic surface with modular size 60x60, recommended for gardens, patios, parks, swimming-pools, exhibition centers and the outdoor mats of bars and restaurants. The module can be personalized with the following products in fine porcelain stoneware: Teknowood, Età della pietra, Pietre di Lugandis and Terramara.

Sopraelevato is a free-standing, inspectable, sectioned modular paving dry-mounted on special plastic supports with fixed or adjustable height that raise it above the substrate or waterproofing membrane and allow it to be levelled.
